VisualPay DoubleSided with dual displays (27 or 32-inch) is the perfect solution to optimize time and space. Thanks to its dual functionality, two users can operate simultaneously, reducing wait times and improving efficiency during the ordering and/or payment phase. Fully customizable in design and functionality, it adapts to every business need, from retail to hospitality. Robust, intuitive, modern, and compatible with the *SelfPay* line for cash management, it is the ideal tool to deliver a flawless user experience.

Functional features

Dual functionality, maximum efficiency

Double Sided allows two users to operate the device simultaneously, reducing wait times and improving workflow in high-traffic environments. Ideal for airports, shopping malls, or healthcare facilities, it optimizes the user experience without compromising service speed.

Compact design, optimized space

Thanks to its smart and compact design, the VP *Double Sided* makes the most of available space, making it perfect for areas with limited surfaces. The dual functionality requires no additional footprint, offering a practical and elegant solution for any environment.

Customization and limitless versatility

It can be configured for specific needs and tailored functionalities. Suitable for various sectors, from retail to hotels, it supports operations such as check-in, payments, bookings, or information, ensuring a simple and accessible user experience thanks to intuitive screens and user-friendly interfaces.

Reliability, security, and savings

Built with durable materials and equipped with advanced technologies, *Double Sided* ensures long-lasting performance and data protection. By automating repetitive processes, it reduces the need for dedicated staff, optimizing resources and cutting operational costs.
